

SOLUTIONS FOR AGRICULTURE

Keeping your business smooth all year long

Brands of
NTN Group

INNOVATION DRIVING YOUR PRODUCTION

Movement. It is constantly changing. It is analysed, brought under control, guided and mastered with the aim of deriving maximum benefit. It is more than merely a concept. It is the very essence of our commitment, namely designing and innovating to deliver the perfect solutions to the issues and constraints of today and tomorrow.

There are thousands of us around the world masterminding and developing solutions to raise the bar on your production performance. Our world-leading brands (NTN, BCA, BOWER and SNR) are marketed worldwide and deliver the best-fit solutions for working together and building a more environmentally-friendly society. Follow our lead and use interaction, anticipation and adaptation as the keys to guiding and shaping the future of the manufacturing, automotive and aviation markets.

solutions dedicated

TO THE AGRICULTURAL MARKET

More
than **4**
million
bearings

FOR FARMING EQUIPMENT
SOLD EVERY YEAR

A FRUITFUL COLLABORATION WITH THE AGRICULTURAL MACHINERY GIANT.

For more than 40 years, NTN Europe has manufactured bearings for KUHN, the world leader in agricultural machinery. At the heart of this special relationship: the same passion for quality and innovation.

World leader within its market, KUHN, founded in 1828, has doubled its sales in six years, topping the billion euro mark. A development nourished by innovation, with 100 R&D engineers out of a total of 5,000 staff – and 1,600 patents filed. KUHN's objective is to design and manufacture reliable, enduring, innovative and environmentally-friendly machines that best meet the needs of its customers. KUHN expects its suppliers to have the same degree of investment in quality and innovation, and strive towards these shared goals. With regard to bearings, KUHN has placed its trust in NTN Europe for four decades.

Longer service life

This trust is based first and foremost on our capacity to produce stronger bearings suited to dusty environments and heavy loads, changing working conditions and the need for unfailing reliability. *"The longer service life and the consistent quality of the bearings supplied are for us a valuable asset"*, says Bernard Jacob, lead buyer at KUHN. For instance, NTN manufactures for KUHN a bearing with two rows of angular-contact ball bearings (ACBB), used on the cutter bars of mowers. *"Used in the automotive industry,*

this bearing offers an excellent technical base that has been adapted and tailored to meet the requirements of KUHN's mowers", stresses Jean-Michel Hée, Agriculture Sales Executive at NTN Europe.

Smart agricultural machines

Another valued-added factor is innovation. *"And more particularly the ability of our main suppliers to carry out technological intelligence, to be a proactive force"*, points out Bernard Jacob. In this instance, KUHN and NTN Europe draw on a relationship of trust, forged 40 years ago, to progress together.

Progress reports on projects and development programmes are provided at regular intervals. *"We appreciate the sustained technical and commercial relations between the project teams of our two companies; the reactivity and quality of these relations help us progress and finalize our projects"*, explains Bernard Jacob. It is also an opportunity to devise smart agricultural machines that take full advantage of the resources of on-board electronics, a key focus of research for KUHN's R&D, and one of the keys to meeting the requirements of our customers.

Our solutions

Cover all existing applications on the market.

SOIL WORKING _____ 6

Bearings that can adapt to all types of conditions, for optimal preparation of the soil prior to seeding.

- ▶ Reduced maintenance frequency.

SEEDING _____ 14

Solutions that guarantee robust guiding of the seeding discs.

- ▶ Precise seeding and reliable operation.

HAY / SILAGE MAKING _____ 16

High-speed bearings ensure the best possible harvests to maintain the quality of fodder.

- ▶ Maintenance free.

BALING _____ 18

A tried and tested technology featuring high-performance bearing seals.

- ▶ Produces high-quality bales of consistent density.

HARVESTING _____ 20

Acknowledged expertise in sealing solutions for polluted environments.

- ▶ Reliable bearings for intensive and continuous operation of harvesting machinery.

MAINTENANCE _____ 26

Acknowledged expertise in sealing solutions for polluted environments.

- ▶ Suitable equipment for bearing maintenance.

PRODUCT REFERENCES _____ 28

An offer of 300 most-used products.

- ▶ A technical answer to every need.

OUR STANDARD RANGES _____ 44

Agriculture also means a lot of standard products.

- ▶ The answer for all your applications.

AGRIHUB,

Unfailing protection for the most demanding environments

Environment		
polluted	very polluted	extremely polluted

Choose NTN Europe's expertise in design and sealing for reliable equipment and remarkable productivity.

Pollution is blocked from entering

Thanks to a sealed barrier consisting of 8 lips on the exposed side.

Shock-resistant

Thick, robust hub prevents premature failure.

Ready to install and compatible

With a wide range of equipment.

GREASED FOR LIFE

ZINC COATING

P6X class

For rapid mounting of your tools

Gain speed and precision during installation thanks to our **tapered roller bearings** in reduced tolerance class P6X.

- Simplified measuring procedures: reduced width tolerances allow a more direct and quicker assembly procedure (less dimensional dispersion by the bearings)
- Greater stability in the axial adjustment of bearings, for optimum performance of your machines over time

NTN Europe offers a wide range of tapered roller bearings (imperial and metric), available in through hardened steel or case hardened steel.

Comparison of the P6X tolerance class and the normal tolerance class

		Outer diameter (mm)		Bore diameter (mm)		Tolerance	
		>	≤	>	≤	Normal	P6X

Insert bearing with AGR seal

Our know-how guarantees your peace of mind

Environment		
polluted	very polluted	extremely polluted

GREASED FOR LIFE

Created to increase productivity, performance and reliability in harsh environments.

The assurance of exemplary quality:

- Protection against pollution which is unique on the market
- Resistance to high-pressure washing
- Alternative solution to standard seals

Comparison of seals

Seals for insert bearings	Description	Severe contamination (mud, sand, etc.)	Projections (stones, earth, etc.)	High-pressure cleaning	Rotation speed (% of max. speed)
	Single-lip seal Single-lip seal in nitrile rubber moulded on a metal framework. Available as standard for US and ES series	★★★★	★★★★	★★★★	100%
	Single-lip seal with shield Single-lip seal in nitrile rubber moulded on a metal framework, with an additional rotating shield. Available as standard for UC and EX series	★★★★	★★★★	★★★★	100%
	Triple-lip L3 seal Seal for very polluted environments: triple-lip nitrile rubber seal protected by a corrosion-resistant metal sheet. Available for UC...L3 and EX...L3 series	★★★★	★★★★	★★★★	30%
	Labyrinth ring seal L4 Seal for polluted environments, with lower rotational torque. 2 nitrile rubber seals on a corrosion-resistant sheet forming a 3 lip system + labyrinth ring seal. Additional corrosion-resistant protection of the bearing's rings. Available for UC2...L4 and EX2...L4 series, up to a bore diameter of 50 mm	★★★★	★★★★	★★★★	40%
Specific for AGRICULTURE 	"AGR" sealing technology: L3 + shield L3 Seal type for very polluted environments, reinforced by an additional protection: zinc-coated shield, with a reinforcement on the inner ring and a lip to seal the contact with the outer ring. Additional corrosion-resistant protection of the bearing's rings. Available for UC2...AGR and EX2...AGR series, up to a bore diameter of 50 mm	★★★★★	★★★★★	★★★★★	25%

Inserts with AGR seals exist:

- With a locking-pin option on the outer diameter (e.g.: UC309AGRLP)
- With bearing unit in grey or ductile cast iron

Bearing inserts from the AGR series cannot be combined with all housings due to the reinforced seal. They have been designed for installation in snr housings from the P, PE, F, FE and FL, FLE series, but can also be combined with housings from other series.

Please consult our technical department if you are interested in other combinations.

A focus of technology

Dedicated to your seeding

Environment		
polluted	very polluted	extremely polluted

**The strength of a heavyweight
in a lightweight bearing.**

Precision seeding by using the 204XAGR bearing:

- 4-point angular contact technology for robust and precise guiding of the seeding discs
- L3 sealing for maximum protection against pollution

LLU, an environmentally friendly seal:

- Grease retained inside the bearing
- Barrier which is resistant to external particles and liquid

A seal fit for purpose, whatever your constraints

Environment		
polluted	very polluted	extremely polluted

"AGR" seal: L3 + shield.

GREASED FOR LIFE

**Designed for extremely polluted
and harsh environments:**

- Zinc-plated shield equipped with a single lip seal to seal the contact with the outer ring (zinc-plated)
- Additional corrosion-resistant protection of the bearing's rings (surface treatment)
- Impact resistance ensured by the thickness of the shield

Bearing inserts from the AGR series cannot be combined with all housings due to the reinforced seal. They have been designed for installation in SNR housings from the P, PE, F, FE and FL, FLE series, but can also be combined with housings from other series. Please consult our technical department if you are interested in other combinations.

Interchangeable
with our standard seals

Our maintenance range to boost your productivity

DRIVE BOOSTER New generation

More than half of all bearing failures are due to poor lubrication. DRIVE BOOSTER enables you to simplify your maintenance and your productivity.

Benefits:

- Constant lubrication of bearings
- Saves time on a daily basis
- Reliability in terms of the quantity of lubricant dispensed
- Easy to integrate without modifying your installation
- Reusable components

Download our DRIVE
BOOSTER brochure

Manual pump & grease

The ideal greasing tool on farms.

Pump can be operated with one hand:

- Precise injection of grease thanks to the special greasing connector developed by NTN Europe
- A specific range of grease for your applications

HEAVY DUTY: years of experience dedicated to extreme applications

The solution adopted by the profession.

Lubrication suitable for agricultural uses:

- Top-quality grease for intensive applications handling heavy loads
- Very good protection against wear and corrosion of the bearings

Product references

An offer of 300 most-used products.
A technical solution to each need.

Deep-groove ball bearings

Download our
HANDBOOK

NTN and SNR: two brands for a solution which is tailored to your needs

LLU sealing:

The seal is designed to ensure interference between the inner lip and the inner ring:

- Grease retention in the bearing
- Prevention of pollution penetration
- Positioning of the outer lip (non-contact) for a labyrinth effect reinforced by the V-groove

During the operating cycle of the bearing, the reduction of interference from the inner lip gradually brings the outer lip into contact with the inner ring.

- Reinforcement of the seals' performance for long-lasting protection

NTN seals are the optimum solution for the most demanding applications.

EE SNR sealing:

The design of the SNR friction seal is based on one lip in contact and two non-contact lips to create a labyrinth effect.

This sealing solution offers reduced friction torque for the best compromise between speed and sealing performance.

Cylindrical roller bearings

ULTAGE™ is the NTN label for ultimate performance. Applied to cylindrical roller bearings, it means:

- Higher load capacity for longer service life
- Lower heating during operation to allow higher rotation speed

Benefits of the **ULTAGE** range:

* Compared with a standard non-ULTAGE NTN product (with oil lubrication)

Taper roller bearings

A complete range of tapered roller bearings, to cover all market needs:

- 10 most popular metric series and 4 increased angle series
- More than 200 series in inch dimensions

High quality steels:

- NTN brand: in through-hardened and case-hardened steel, with both steels offering the same level of service life
- SNR brand: through-hardened steel only

Identification

All our references featuring case hardened steel are recognisable thanks to the prefix **4T**.

Needle roller bearings

A wide range "made in Japan":

- Needle roller and cage assemblies
- Drawn cup needle roller bearings
- Needle roller bearings with solid rings
- Combined bearings
- Cam followers and cam followers on shafts
- Needle roller thrust bearings

Agriculture uses **many** standard products

Spherical roller bearings

Quality **ULTAGE™**

ULTAGE™, the generation of NTN high-performance bearings delivering:

- Unrivalled service life
- Higher speed limits
- Maximised load capacities

i Bearings designed according to **ULTAGE™** rules can be identified with the **suffix E**.

KIZEI®, the viable alternative for dirty environments

- Protection against external solid contamination
- Improvement of grease retention inside the bearing
- ISO dimensions to replace open spherical roller bearing easily
- Load capacity, speed and operating temperature identical to an open ULTAGE™ bearing

Sealed bearings with elastomer seals

- Internal design identical to ULTAGE EA open design bearings
- No-ISO width with minimal increase to integrate seals (prefix 10x)
- Specially designed nitrile seal which guarantees sealing by constant contact pressure of the lip, even in case of misalignment
- Pre-filled bearing with a quantity and quality of grease suitable for high loads
- Operating up to +120°C

Self-aligning bearing units

Pressed steel bearing units

Best economical solution for lightweight constructions

Benefits:

- Particularly used in applications where weight is a major constraint

Technical characteristics:

- Two-piece housing made from zinc coated steel sheet
- Available as pillow block, flanged or take-up unit
- Equipped with universal inserts
- Suitable for narrow ball bearing inserts set screw type US..G2, eccentric locking collar type ES..G2 and type CS with interference fit
- Made for low to moderate loads & speeds
