PRESS RELEASE – 2 July 2026

NTN Europe confirms its participation in the upcoming Automechanika Frankfurt 2026

A must-attend event for the aftermarket sector, Automechanika Frankfurt will bring together nearly 4,500 exhibitors and over 100,000 industry professionals from around the world from 8 to 12 September 2026 to discover the sector's latest innovations, trends and technologies first-hand. As a leading player in the European aftermarket, NTN Europe will be in Hall 4, Stand D21, to meet with its partners, distributors and industry professionals and present an ever-more-comprehensive range of offerings, from technical products to value-added services.

A one-stop shop for all types of vehicles

On a 110 m² stand, NTN Europe will showcase the full extent of its expertise across six complementary areas: CHASSIS, POWERTRAIN, SENSOR, TRUCK, 2 WHEELS and SERVICE. Bringing together products, technical expertise and services under a single partner, this comprehensive offering covers a wide range of applications, from light vehicles – whether petrol, diesel, hybrid or electric – to heavy goods vehicles. It draws on the group's OE know-how to meet the needs of aftermarket professionals.

The star products of this edition, the shock absorbers, will illustrate NTN Europe's growing presence in this market. Showcasing them will also provide the supplier with an opportunity to share its ambitions and present its comprehensive vision of the wheel assembly, based on recognised expertise across all its constituent components.

"For us, Automechanika is above all an opportunity to meet and exchange ideas with our partners. This 2026 edition directly reflects NTN Europe's momentum: an expanding product range, strengthened product lines, and growing services. We look forward to sharing all of this with visitors," says Amélie PAVIET, Logistics & Marketing Director and Deputy Director of the Automotive Aftermarket.

Innovation Awards: MySNR Certified Garage in the running

NTN Europe is competing this year in the Automechanika Innovation Awards 2026 with its MySNR Certified Garage programe a certification initiative aimed at automotive professionals. This entry illustrates the group's ambition to go beyond the product itself in order to support its customers – whether distributors or repairers – in their development. The awards ceremony will take place on 8 September, at the opening of the trade fair.

AI and digitalisation at the heart of the event

In a sector undergoing rapid digital transformation, where artificial intelligence is redefining practices and applications, NTN Europe is using digitalisation as a driver of performance for its partners, with connected tools and value-added services designed for the workshop of the future. Throughout the trade fair, NTN Europe's teams will be on hand to talk to visitors and answer questions about each European market.

See you from 8 to 12 September 2026!

For more information on our product ranges, visit the NTN Europe website.
